

XForce

Imagine the Potential...

Create an Anchor Attraction unlike any other by combining the **multi-arm XForce hardware platform** with your storyboard of licensed IP characters, and send your guests on a thrilling adventure they'll be sure to ride again and again!

The **10-arm, 40 guest, 125 ton rotating platform** of the XForce is the only multi-arm hardware platform that provides **sustained, linear Gravitational Forces (G-Forces)**. These powerful G-forces produce the ultimate effect as we combine them with pitch and roll capabilities to yield a head to toe (downward into your seat), front to back (pushed back into your seat), back to front (lifting out of your seat), and/or side to side (turning or rolling) experiences that are nothing short of breathtaking.

Viewed on an impressive panoramic dome display, every turn, drop, acceleration, launch, or tumble of your storyboard adventure can come to vibrant life and leave your audience with spine-tingling excitement. Ask how you can incorporate your IP onto the XForce today!
